Day 3 (05/11): Sorting Data with ORDER BY

🎯 Objective

To understand how to **sort data** in ascending or descending order using the ORDER BY clause in SQL, including sorting based on **multiple columns** for more structured and meaningful results.

🔍 Topics Covered

➤ ORDER BY Clause

Used to sort query results based on one or more columns.

➤ Sorting in Ascending Order (ASC)

Default sorting method.

Returns results from *smallest to largest* or $A \rightarrow Z$.

➤ Sorting in Descending Order (DESC)

Reverse sorting.

Returns results from *largest to smallest* or $Z \rightarrow A$.

ORDER BY Clause

The ORDER BY clause is used to **sort the result** of a query in **ascending or descending order** based on one or more columns.
By default, sorting is in **ascending (ASC)** order.

Syntax :-

```
SELECT column1, column2, ...  
FROM table_name  
ORDER BY column_name ASC;
```

```
SELECT column1, column2, ...  
FROM table_name  
ORDER BY column_name DESC;
```

Practice Questions:

```
1  -- List all patients sorted by age in descending order.
2  * SELECT *
3  FROM patients
4  ORDER BY age DESC ;
```

patient_id	name	age	arrival_date	departure_date	service	satisfaction
PAT-112d537f	Kevin Oconnor	89	2025-08-08	2025-08-10	surgery	65

PAT-b96272b5	Jose Ramirez	88	2025-10-11	2025-10-12	general_medicine	96

- ***SELECT **** → selects all columns from the table (patient_id, name, age, service, etc.).
- ***FROM patients*** → tells SQL to get the data from the patients table.
- ***ORDER BY age DESC*** → sorts the result based on the age column in descending order (from highest age to lowest age).

Practice Questions:

```

6  -- Show all services_weekly data sorted by week number ascending &
7  -- patients_request descending.
8 • SELECT *
9  FROM services_weekly
10 ORDER BY week ASC , patients_request DESC ;

```

Result Grid Filter Rows: Export: Wrap Cell Contents:									
	week	month	service	available_beds	patients_request	patients_admitted	patients_refused	patient_satisfaction	staff_mor
▶	1	1	general_medicine	37	201	37	164	97	43
	1	1	surgery	45	130	45	85	83	78
	1	1	emergency	32	76	32	44	67	70
	1	1	ICU	22	31	22	9	84	91
	2	1	general_medicine	43	183	43	140	73	93
	2	1	emergency	28	169	28	141	75	64
	2	1	surgery	40	26	26	0	96	56
	2	1	ICU	16	7	7	0	79	85
	3	1	emergency	32	177	32	145	73	58
	3	1	surgery	27	66	27	39	63	72
	3	1	general_medicine	37	58	37	21	95	63
	3	1	ICU	20	21	20	1	82	89
	*	*	32	177	32	145	73	58

This shows all data from `services_weekly`, sorted by week in ascending order, and if weeks are the same, it sorts by `patients_request` from highest to lowest.

Practice Questions:

```
12  -- Display staff members sorted alphabetically by their names.
13 • SELECT *
14  FROM staff
15  ORDER BY staff_name ASC ;
```

Result Grid	Filter Rows:	Edit:	Export/Import:	Wrap Cell Content:
staff_id	staff_name	role	service	
STF-1881ede3	Aaron Wise	nurse	ICU

STF-4740993e	Ashley Waller	nursing_assistant	ICU	
STF-bcb3f4fe	Brent Jordan	nurse	general_medicine	

This query shows **all staff members** and sorts them **alphabetically by their names in ascending order (A → Z)**.

Daily Challenge:

```
1  -- Retrieve the top 5 weeks with the highest patient refusals across all services,
2  -- showing week, service, patients_refused, and patients_request.
3  -- Sort by patients_refused in descending order.
4 • SELECT
5      week,
6      service,
7      patients_refused,
8      patients_request
9  FROM services_weekly
10 ORDER BY patients_refused DESC
11 LIMIT 5 ;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Contents: | Fetch rows: |

	week	service	patients_refused	patients_request
5	5	emergency	363	388
12	12	emergency	319	347
8	8	emergency	214	240
51	51	general_medicine	211	285
1	1	general_medicine	164	201

This query displays the **top 5 weeks** with the **highest number of patient refusals**, showing the week, service, patients_refused, and patients_request — sorted from **highest to lowest refusals**.
